PROFESSIONAL SUMMARY

Full stack developer with 9 years building production web platforms, 7 of them on Laravel. Core developer on ArabsStock, an Arabic stock media marketplace holding over 1 million assets, where I own full-text and faceted search in Elasticsearch, the contributor ingest pipeline, and the RabbitMQ queues behind both. Strong across the stack — Vue.js and Nuxt.js on the front end, PHP, Python, MySQL, Redis, Docker and Kubernetes behind it — working to OOP and SOLID principles, writing PHPUnit tests, reviewing pull requests and documenting what I ship.

TECHNICAL SKILLS

Languages: PHP, Python, JavaScript, SQL, HTML5, CSS3

Frameworks: Laravel, Vue.js, Nuxt.js, Inertia.js, Livewire

Backend & Architecture: REST APIs, GraphQL, WebSockets, MVC, OOP, SOLID, design patterns, Eloquent ORM, database migrations, modular architecture

Testing & Quality: PHPUnit, unit and feature testing, code review, refactoring, technical documentation

Databases & Search: MySQL, Redis, Elasticsearch

Messaging & Queues: RabbitMQ, Laravel Queues, FCM push notifications

Media Processing: Python (Pillow, ImageMagick), FFmpeg, image and video pipelines

DevOps & Cloud: Docker, Kubernetes, Nginx, Linux, Git, CI/CD, AWS (S3, CloudFront)

Payments: HyperPay, Stripe, PayPal

Practices: Agile/Scrum, mentoring, application security, SEO optimization, AI-assisted development (Claude Code, GitHub Copilot)

PROFESSIONAL EXPERIENCE

Full Stack Developer

Kenan Technology | Gaza, Palestine | January 2021 – Present

ArabsStock — Arabic stock media marketplace (1M+ assets)

- Implemented Elasticsearch full-text and faceted search across 1M+ media assets, adding Arabic normalization of diacritics, hamza and ta-marbuta so unvocalized queries match vocalized titles.
- Designed the contributor upload portal for photos, vectors, video and audio, with metadata entry and an editorial review workflow before publication.
- Engineered Python media-processing pipelines for resizing, watermarking, vector rasterization and FFmpeg transcoding, dispatched as RabbitMQ jobs so uploads never block an HTTP request.
- Co-architected and built the admin dashboard covering users, assets, orders, payouts and financial reporting.
- Integrated HyperPay, Stripe and PayPal for subscription and per-asset purchases, plus FCM push notifications.
- Optimized the public website for organic search: sitemap generation, structured data, lazy loading and Redis caching.
- Maintained Docker and Kubernetes deployments on a CI/CD pipeline running on Linux behind Nginx, with media served from AWS S3 and CloudFront.
- Wrote PHPUnit unit and feature tests, reviewed colleagues' pull requests, mentored junior developers and documented service boundaries.

ESG — Enterprise governance platform

- Developed Laravel backend modules for ESG reporting and compliance workflows, covering recurring disclosure cycles, evidence attachments and multi-step approval chains.

Web Developer (Contract)

Accessline | October 2022 – December 2022

- Built a nutrition and wellness platform in Laravel and Vue.js, delivering client onboarding, plan management and service-delivery workflows.

Web Developer

Apex for IT Solutions | Gaza, Palestine | June 2020 – August 2020

- Developed OSRAPP with Laravel, REST APIs and Firebase Cloud Messaging.
- Delivered MY HOME with HyperPay payment gateway integration and Firebase push notifications.
- Extended MYCN using Laravel and the Metronic admin theme.

Web Developer (Contract)

Rasd | June 2020 – August 2020

- Built a social listening and analytics platform integrating the Facebook, Twitter and Awario APIs, normalizing three

different response shapes into a single real-time mention feed.

Web Developer

Effects for Consultations and Development | Gaza, Palestine | February 2019 – April 2020

- GCC: delivered a data-visualization dashboard with Gantt charts, calendars and Vuex state management.
- HADEEDAPP: implemented geo-location and Google Maps integration for field-staff tracking.
- QSOF: delivered a WordPress solution with custom PHP backend logic.

Web Developer

Space | Gaza, Palestine | July 2017 – December 2017

- Developed a cultural web platform for the Future Society for Culture and Development using PHP, MySQL and WordPress.

EDUCATION

Bachelor's Degree in Information Technology and Communications

Al-Quds Open University | 2013 – 2016

LANGUAGES

Arabic: Native. English: Professional working proficiency.
