

IBRAHIM SALAMA MADI

Full Stack Web Developer | Laravel · Vue.js · Elasticsearch

ibrahim.s.m.2010@gmail.com | +970 597 866 994 | Gaza, Palestine | [linkedin.com/in/madi-madi](https://www.linkedin.com/in/madi-madi) | github.com/madi-madi

PROFESSIONAL SUMMARY

Full Stack Developer with 7+ years of experience designing and building scalable web platforms with Laravel and Vue.js. Co-architected ArabsStock, an Arabic stock media marketplace serving 1M+ assets, spanning its admin dashboard, contributor upload portal, and public website. Strong background in high-performance backend systems using Elasticsearch, Redis, and RabbitMQ, alongside Python-based image and video processing pipelines. Two years of hands-on experience with AI-assisted ("vibe coding") development workflows. Committed to clean, maintainable code and continuous delivery.

TECHNICAL SKILLS

Backend	PHP, Laravel, Python, REST APIs, Modular Architecture
Frontend	Vue.js, Nuxt.js, Inertia.js, JavaScript, HTML5, CSS3
Databases	MySQL, Redis, Elasticsearch
DevOps & Infrastructure	Docker, Kubernetes, Nginx, Git, CI/CD
Messaging & Notifications	RabbitMQ, FCM Push Notifications
Media Processing	Python (Pillow, ImageMagick), FFmpeg, image/video pipelines
Payments & SEO	HyperPay, Stripe, PayPal, SEO Optimization
Ways of Working	Agile/Scrum, AI-assisted ("vibe coding") development

WORK EXPERIENCE

Full Stack Developer — Kenan Technology

January 2021 – Present

ArabsStock — Arabic Stock Media Marketplace (1M+ assets)

- Co-architected and built the full admin dashboard for managing users, assets, orders, and financials.
- Developed the contributor upload portal supporting photos, vectors, videos, and audio with metadata workflows.
- Built and optimized the public-facing website with advanced SEO techniques, including sitemap generation, structured data, and lazy loading.
- Engineered Python-based media processing pipelines for image resizing, watermarking, vector conversion, and video transcoding.
- Implemented Elasticsearch for full-text and faceted search across 1M+ media assets.
- Designed asynchronous job queues with RabbitMQ for heavy processing tasks; used Redis for caching and session management.
- Integrated FCM push notifications and third-party payment gateways, including HyperPay.
- Maintained CI/CD pipelines using Docker and Kubernetes for production deployments.

ESG — Enterprise Governance Platform

- Developed backend modules using PHP Laravel for ESG reporting and compliance workflows.

Web Developer — PHP Laravel & Vue.js — Accessline

October 2022 – December 2022

- Built a nutrition and wellness platform, improving client engagement and service delivery workflows.

Web Developer — PHP Laravel — Apex for IT Solutions

June 2020 – August 2020

- Developed OSRAPP using Laravel, FCM Firebase, and REST APIs.
- Built MY HOME with HyperPay payment gateway integration and Firebase push notifications.
- Contributed to MYCN using Laravel and the Metronic admin theme.

Web Developer — PHP Laravel & Vue.js — Rasd

June 2020 – August 2020

- Built Rasd, a social media listening and analytics platform integrating Facebook, Twitter, and Awario APIs for real-time brand monitoring.

Web Developer — Laravel & Vue.js — Effects for Consultations and Development

February 2019 – April 2020

- GCC: Built a data visualization dashboard featuring Gantt charts, calendars, and Vuex state management.
- HADEEDAPP: Implemented geo-location and Google Maps integration for field tracking.
- QSOFIT: Delivered a WordPress-based solution with custom PHP backend logic.

Web Developer — PHP — Space

July 2017 – December 2017

- Developed a cultural web platform for the Future Society for Culture and Development using PHP, MySQL, and WordPress.
